Preface

Welcome to the 2014 edition of "Where to Build – Where to Repair". This yearbook comprises comprehensive listings of 937 selected shipbuilding and ship repair yards world wide. We aim to include shipyards offering newbuildings, conversions and repairs of merchant vessels, cruise ships, offshore and specialized vessels, The listings is free of charge and we depend on the shipyard's cooperation in keeping the information accurate and up-to-date. Where we have not succeeded in getting direct contact with the shipyard the information given have been checked with the yard's own website.

Access to the Online edition is available on www.seadirectory.com. You can order the Directory at the same place.

The shipyard section is organized alphabetically by Continent and then by Country. All agents and representatives are alphabetically listed at the back of the book.

We hope you find this edition useful and informative. As we always want to be in touch with our customers needs, we would welcome your suggestions for further improvements.

Our publishing house took over the publishing rights to "Where to Build – Where to Repair", "Scandinavian Shipowners" and "Norwegian Offshore Index" in July 2008. From before we publish "Skipsfartens Innkjøpsbok" (Preferred Makers List) on paper and on the Internet at www.maritime-suppliers.com.

ABBREVIATIONS and EXPLANATIONS

NB – Newbuilding Yard

Rep – Shiprepair Yard

Facilities: Dimensions are given in meters and metric tons.

Cy = Capacity in dwt/lifting tons

Crane = Maximum crane capacity

R = Repair dock

N = Newbuilding dock

Graving docks: Standard width is given at entrance. Capacity is given in tons deadweight (dwt)

Floating docks: Standard is given between inner walls. Capacity is given in lifting tons.

Slipways and Syncrolifts: Capacity is given in lifting tons.

Representatives: Listing of yards' representatives abroad include both exclusive and non-exclusive agreements.

The information recorded in this yearbook is in principle received directly from shipyards, repairers and their representatives and agents. In some cases the information are supplemented from the yards own website on the Internet. The publisher does not, however, guarantee the accuracy of the information printed in the yearbook nor does it accept responsibility for errors or omissions or their consequences.

Ltd., offers unrivalled expertise, both in the marine and non-marine sectors, which has enabled it to earn the confidence of a wide variety of International Ship owners and multinational industries in the non-marine sector.

AMGECO has earned international repute amongst various navies as well. The yard has the facility for a helicopter landing in order to carry out emergency repairs to mobile machinery and equipment which can be airlifted to the yard. The company used to carry out work for the British Royal Navy when a pump was flown in for emergency repairs and HMS Meon slipped at the yard. The French Navy has used the services of the

yard when FNS Albatros was in the dry dock in 1988 and 1989. The company is also authorised to carry out repairs for the Kenya Navy vessels and has had the opportunity to be of service to the Tanzania Navy. AMGECO had also qualified to be registered under the US Navy in Bahrain program “Master Agreement for Repair and Alteration of Vessels (MARAV) certification.” Some of our welders are therefore registered with the US Navy Ship Repair Unit (SRU) in Bahrain.

Services: Gasfreeing, Slop Receiving, Sludge Receiving, Grit/Sand Blasting, HP Water Blasting, Boiler repairs, Underwater Repairs**Service agreements:** - Civil Marine Works - Pipeline Support & Installation - Cable Installations & Support - Project Management - Pumping & Dredging - Hydrographical & Marine Geophysical Surveys - Offshore Support - Inspection Services - Class Inspections & Underwater Surveys - Towing Salvage & Wreck Removal**Other relevant information:** Namdock, a massive 11 500 tonne floating dock now in service at the port of Walvis Bay, has placed Namibia on the world map as a location where oil tankers and ships can be repaired. - The first dock of its type along the treacherous southern west coastline, Namdock will be of significant benefit to vessels operating in the area and to those plying Africa's rugged southern west coastline. Namdock was acquired in a joint venture involving the ship repair company, Elgin Brown & Hamer Namibia (Pty) Ltd, and the Namibian Ports Authority, NamPort. - Namdock is identical to Eldock, the Elgin Brown & Hamer Group's highly successful Durban-based floating dock - the first privately owned floating dock in South Africa. Namdock comprises a concrete pontoon flanked by two steel walls and has the capacity to lift vessels of up to 160 metres long and 23,5 metres wide, with a weight of up to 8 500 tonnes. It has

the same advanced multiple lifting system as that was developed by Elgin for Eldock. - The Elgin Brown and Hamer Group comprises of 8 companies. Together they provide the international ship industry with a full in-house service in all aspects of ship repair. First for Southern Africa includes privately owned floating docks with multiple docking capacity, a floating crane, barges, tug and a launch.

Contact: Mr. Arnaud de Lestapis

Address: 19, Avenue Alphonse Daudet, Domaine du Lac Bleu, 13480 Cabries, FRANCE

Info: The services proposed by ALMARINE are organised according to three axes :

Consulting services for the shipowners, and investors in shipping, based on a ten years experience of ships technical management.

Representation of shipyards, faithful in particular to a partnership of more than twelve years with one of them.

An activity of legal expert based on the experience accumulated and the independence of mind forged during a whole career.
