## **A2Sea AS**

**Company Category:** Shipowner

**Tel.:** +45 7592 8211

**Fax:** +45 7592 6375

**E-mail:** a2sea@a2sea.com

**Web:** www.a2sea.com

**Visiting address:** Kongens Kvarter 51,, 7000 Fredericia

**Postal address:** Kongens Kvarter 51,, 7000 Fredericia, DENMARK

**Managing Dir.:** Jens Frederik Hansen

**Operation Mngr.:** Hans Schneider

**Other relevant information:** A2SEA maintains and operates its own fleet of specially designed vessels and equipment. This gives us the flexibility to carry out many types of offshore wind installations and operations. We currently have the greatest capacity of any company in the offshore wind industry and continue to make significant investments in larger and more flexible vessels for the future. In doing so we can remain at the cutting edge of the wind industry and our customers' projects can continue to be carried out on time and on budget with excellence in safety.

A2SEA develops and manages vessel pools for service of offshore wind turbines. Each pool consists of one or more vessels which are shared between different sites and/or wind farm owners. By sharing the vessel between different sites and owners, A2SEA can optimise the usage and thereby lower the cost for the clients. Park owners or maintenance providers can also guarantee the availability of vessels at short notice, which is often difficult to do on the spot market.

Different types of vessel are covered by the pool agreement including crane vessels, jack-up barges, cable repair vessels, crew boats or accommodation vessels. As the market develops, we are developing more vessel pools with capacity for new sites/owners and even 3rd party vessels for management.

Since July 2009 A2SEA has been 100% owned by DONG Energy Power but in November 2010 Siemens Wind Power entered as part-owner. DONG Energy Power remains principal shareholder.
